How is Cocaine Used?

Cocaine can be snorted, injected, smoked or eaten. The level and length of the effects depend on how the drug was induced.

	<u>Onset</u>	<u>Duration</u>
Snorted	1 minute	20-40 minutes
Injected	1-5 seconds	15-20 minutes
Smoked	Immediate	5-15 minutes

Cocaine's Physical Effects

While even the purest cocaine is dangerous, the cocaine that is purchased on the streets is even more so as it is often cut with powders of similar color, making it extremely impure. Physical side effects that have been known to be caused by cocaine use are:

- Decreased Appetite
- Increased Body Temperature
- Increased Heart Rate
- Dilated Pupils
- Severe Nose Damage (when snorted)
- Violent Behavior
- Kidney Failure
- Seizure and/or Stroke

Cocaine's Physiological Effects

- Increased Alertness
- Decreased Fatigue
- Increased Concentration
- Insomnia
- Increased Irritability
- Increased Psychosis
- Confused Behavior
- Increased Fear
- Extreme Paranoia
- Severe Anxiety Attacks
- Hallucinations (in extreme cases)
- Aggressive Behavior

Addiction and Withdrawal

Cocaine is one of the most addictive drugs known to man. Those who use cocaine heavily or regularly find it extremely difficult to stop and often suffer through serious withdrawal symptoms such as:

- **Severe Irritability**
- **Excessive Sleep**
- **Chronic Depression**
- **Eating Disorders**
- **Paranoia**
- **Nausea / Vomiting**
- **Loss of Sex Drive**
- **Diarrhea**
- **Insomnia**
- **Heart Attack**

Cocaine Testing in the Army

- Cocaine can be detected in urine for 2-3 days after ingestion.
- The Army tests every specimen for:
 - Cocaine
 - THC
 - Amphetamines
- The illegal use of cocaine or any drug goes against Soldiers Values and Warrior Pride.

Additional Information

Additional information on cocaine can be found by contacting the Army Substance Abuse Program or by visiting www.acsap.army.mil.
